Languages

Spanish:
Native

English:

Nivel B2 - Oxford University | EOI

Skills

- Software design and development
- Multilingual programming
- UI/UX design and development
- 2D & 3D web design
- 3D modeling (3ds Max & Blender)
- Digital image processing
- Teamwork and collaboration
- Scrum Master
- Adaptability to different environments
- Communication and technical presentations

Technologies & Tools

Python, C++, C#, Java, JS, HTML, CSS, Three.js, Figma, Axure, Matlab, Blender, 3DsMax, Unity, ROS2, ROSWeb, ESP-IDF, FreeRTOS, Leaflet, Google Earth Engine, Raspberry Pi, Databases, Android.

Project Management

- Agile methodology (Scrum | CDIO)
- Team management (Scrum Master)
- Task management (Trello)
- Version control (GitHub, GitFlow)

Work Experience

Private Programming Tutor

Freelancer | Sep 2023 - Feb 2025

Taught C++, Python, and JavaScript to over 20 students of various levels.

Website Design & Development for a Local Stationery Store

Centromat | Feb 2023 - Jun 2023

Technologies: UI/UX design, illustrations, HTML, CSS, JS, Figma, Axure

Education

BSc in Interactive Technologies

Universitat Politècnica de València (UPV) | 2022 - Present

Projects

AidPet - Robotics Project

UPV | Feb 2025 - Ongoing

AI-powered robotic assistant for visually impaired people, featuring image processing and pattern detection for navigation and security.

Technologies: ROS2, ROSWeb, Python, Linux, Raspberry Pi, Gazebo.

VIMYP - Biometrics & Environment

UPV | Sep 2024 - Feb 2025

Web app collecting air quality sensor data, sending alerts and recommendations for pollution prevention.

Technologies: Android, Arduino, SQL, 3D models, UX/UI, HTML, CSS, JS, Leaflet.

Yummy Fish - Video Game Project

UPV | Feb 2024 - Jun 2024

Educational PEGI 3 video game for children, helping cognitive development through interactive mechanics.

Technologies: C#, Unity, 3DsMax, Blender, Figma, AI, animations.

EcoCity - IoT Project

UPV | Sep 2023 - Feb 2024

Smart streetlight connected to an app monitoring air quality and enhancing night-time safety.

Technologies: Java, Android, Arduino, Firebase, Raspberry Pi, C++, ESP-IDF, MQTT.

GITHidroponic - Web Project

UPV | Sep 2022 - Feb 2023

E-commerce platform for selling hydroponic garden kits, with order management and real time monitoring of the sensors.

Technologies: UX/UI, HTML, CSS, Bootstrap, Flexbox, Chart.js, Figma, Axure.

CDIO - CDIO Project

UPV | Sep 2022 - Feb 2023

Automated irrigation system with sensors monitoring soil moisture and temperature, displayed in a web dashboard.

Technologies: ESP32, C++, Arduino, sensors, Chart.js.
